# GoldSky
CYBER SECURITY SOLUTIONS

GoldSky was founded by cybersecurity thought leaders who are passionate about educating and keeping small-midsize businesses (SMBs) safe in cyber space. After 2 years of extensive research and learning the most common cyber security threats to the SMB world, GoldSky security engineers developed the DREAMSecure℠ Cyber Risk Management System. DREAMSecure℠ CRMS examines and addresses every phase of the SMB cyber risk management and mitigation process.

E ENGAGE — Put the plan into action to mitigate risks.

R REMEDIATE — Develop remediation plans and determine the most cost-effective solutions to close gaps.

A AUDIT — Ensure remediation plan was effective and determine residual risk.

D DIAGNOSE — Identify and risk-rank vulnerabilities related to People, Processes, Facilities, and Technologies.

M MONITOR — Keep eyes on critical assets 24x7x365 and help prevent cyberattacks.

GOLDSKY SECURITY DREAMSECURE℠

Cyber Risk Management System

Key Benefits:

- **Easy to Understand, Easy to Implement**

- **Reduces Risks of Data Theft and Cyber Breaches**

- **Reduces Risks of Fines and Penalties for Non-Compliance**

- **Affordable for Small-Midsize Businesses**

GOLDSKY SERVICES PORTFOLIO

Assessments	Remediation	Managed Security Services	CSOaaS℠	Continuous Monitoring	Incident Response
• Security Risk Assessments • Compliance Gap Assessments • Security Scorecard • Vendor & Supply Chain Assessments	• Security Architecture Reviews • Security Hardware and Software Installations • Firewall Ruleset Reviews • Endpoint Lock-downs	• Remote Monitoring • Internal/External Vulnerability Management • Security Awareness Training Program • Mobile Security • Penetration Testing	• On-Demand CSOs • Policy/Procedure Development • Security Infrastructure • Disaster Recovery • Business Continuity Planning • Cyber Insurance	• Security Monitoring (24x7x365) • End Point Protection • SEIM Advisory • IDS/IPS Advisory • SOC/NOC • Continuous Compliance	• Breach Response • Service Restoration • Digital Forensics • E-Discovery • Disaster Recovery • Business Continuity

Security Risk Assessment

Improve your security posture and achieve compliance with our security risk assessments. Our engineers use a threat-based methodology to conduct a 360 degree assessment on your organizations cybersecurity across five dimensions of security: **people, processes, facilities, technologies,** and **compliance**.

Compliance Gap Assessments

Your organization likely has one or more compliance mandates to adhere to. GoldSky performs compliance assessments for HIPAA, PCI, Privacy Shield, and many other common compliance frameworks.

Remediation Advisory

GoldSky provides remediation advisory services to assist in closing gaps where vulnerabilities have been found.

Vulnerability Assessments

Each Month GoldSky engineers perform automated vulnerability scans on the perimeter of your network. These scans look for the presence of the latest security risks that might be affecting your organization. At the conclusion of each scan, GoldSky engineers will assess the scan results to provide actionable advice on the risks discovered and how to address them.

Security Awareness Training

Training your staff on how to detect a security incident and what to do is a critical step in securing your business. Twice a year, GoldSky engineers hold security awareness programs for your staff. These programs are held as live webinars, and designed to be entertaining and informative.

Penetration Testing

A Penetration Test (ethical hacking) is an assessment that exploits known and unknown vulnerabilities on a web application, operating system, web server, and network. Once a vulnerability has been exploited, a Penetration Test can then show what data can be accessed.

CSOaaS℠

On-Demand Chief Security Officer as a Services. Designed to assist in executive management Policy/Procedure Development and Security Infrastructure.

Disaster Recovery/Business Continuity Planning

Custom designed DR/BCP services available to assist in keeping critical assets and business operations running during unforeseen circumstances.

Continuous Monitoring 24x7x365

GoldSky provides a one-of-a-kind antivirus and endpoint security product that us usually only available to the largest enterprises. This service installs seamlessly and is monitored 24x7 by at datacenters around the world. The service is customized to each organization and provides for deep insight into the security of all your computers and servers. Our service uses an "application whitelisting" approach, which stops malware in it's tracks!

Incident Response

GoldSky offers a full suite of incident response services including 24 Hour Support Hotline and Retained Services.
