

Security Risk Assessment (SRA)

SRA SERVICE OVERVIEW

Are you struggling to keep up with the increasing cyber criminal threats and how they can negatively impact your small-midsize business? **You're not alone.**

A Security Risk Assessment provides organizations benchmarks for comparing their internal security controls with industry best practices. In addition to having an experienced 3rd party cybersecurity advisory firm perform an assessment, **additional benefits include:**

BENEFITS OF A SECURITY RISK ASSESSMENT

- Identification of potential gaps and vulnerabilities that may exist within the organization
- A detailed Remediation Plan with cost estimates for closing gaps and vulnerabilities
- Confirmation that controls, policies and processes are in place as management intends
- Ability to bid for and respond to business requests where evidence of the organization having a formal cybersecurity program in place is a requirement
- Significantly reduced risk of harm, loss or embarrassment to the organization due to sensitive information loss
- Peace of mind assurance to your clients, staff, executives, board members, suppliers and other interested parties that their data is secure.

“We are grateful to have GoldSky as our IT security and compliance partner in the SMB marketplace. You all are incredibly smart and ahead of the game when it comes to assessing a company and providing affordable and efficient IT security and technology solutions!”

- Tim Cadwell
Pension Investors Corporation of Orlando
