

Federal Security Practice

CAGE code: 8DM85

PRACTICE OVERVIEW

GoldSky Security is a national cyber security advisory firm that exists to support public and private sector businesses in their quest to meet today's IT security best-practice adoption demand while achieving compliance mandates.

GoldSky's Federal Practice team is comprised of veteran and former public sector security personnel who have a deep understanding of the security and compliance challenges federal, state and local government agencies face. They provide vital support to both agencies and prime contractors in a wide variety of ways which are listed in Core Competencies below.

Our services are custom-designed to support the protection options for the federal prime contractors and government agencies we serve. The primary objective for all of the companies we partner with is to identify IT security vulnerabilities and provide the professional resources necessary to dramatically reduce the risk of cyber-attacks, malware threats, and data theft.

"We could not be more pleased with our partnership with GoldSky Security. The experience and professionalism from your team has exceeded our expectations from day one. Your team was on-site within a week of our initial call. We appreciate the responsiveness and expertise you provided in performing our NIST 800-171 Gap Assessment and now CSOaaS program.

- Ed Gillcrist
